Environmental Consulting for Surface Transportation

Successful regulatory and societal approval of transportation projects requires a partner with demonstrated expertise in strategic assessment, site and route selection, alternatives evaluation, environmental impact assessment, community engagement, permitting and design. A partner who can get you from initial concept to construction and operations as quickly and efficiently as possible.

Jacobs' environmental services cover every transportation project phase, from strategic planning to design, construction and operations. Our Environmental Planning & Permitting team has completed environmental assessments and permit applications for more than 1,000 projects worldwide. As an industry leader, we have over 6000 environmental professionals who cover every discipline, including air quality, biology, ecology, cultural/heritage resources, environmental justice, geology and geotechnical, hydrology, land use, noise, socioeconomics, stakeholder engagement, traffic and transportation and visual resources specialties.
